FORWARD OBSERVER TRAINING SYSTEM

FOCUSS-2

Advanced Simulator for Forward Observer Training

- User friendly.
- Targets and observation positions can easily be located as desired.
- Simulate various training environments from day to night, illuminations, wind direction and wind speed.
- Simulate artillery and mortar firing of more than 20 units at the same time from different directions with visual and sound effect.
- Each firing effect can be recorded and playback for after action review.
- Both real terrain and/or CGI terrain can be displayed.
- Customized scenarios and target shapes are welcome.
